SERVICES

Software Solutions

Techwarezen Software Solutions has developed a number of products and MIS applications for its clients in this service. Our mature software development processes, combined with excellent infrastructure have significantly increased the “on-time and on-budget” delivery of software in the offshore mode. We use a highly effective IMPACT Methodology for offshore and distributed software development. Our services begin from analysis, moving through designing, development, testing and implementation to maintenance. Our applications come in all sizes, be it a one-table database, or a massive client-server application. The creation of complete database applications is yet another field that we specialize in. We offer:

1. Application Development

- Interactive Application Development
- Custom Application Development/ Maintenance
- MIS and ERP Solutions & Support

2. Re-engineering

1. Application Development Interactive Application Development Interactive Application Development (iAD) is about harmonizing art with technology. This business division of Techwarezen Software Solution complements the client's requirement of online and desktop applications - be it a workgroup solution or mailing platform. It adds a further arc to the circle of 'Net Totality'.

Website Development Websites can enhance awareness of your brand, leading to more sales. Build relationships with customers, vendors, and shareholders through your online identity get more traffic from the search engines Get more traffic from the search engines, fast loading web pages with excellent navigation and designing, communicate more effectively. Either you are looking for Dynamic site or a static site is your solution we can help you acquire both. We offer web sites on flash, asp, php which are tailor made to target your customers and make your presence live on web.

Search Engine Optimization Your website doesn't mean anything to anyone unless it can be found by your customers. Phase two in Web Promotion is optimizing your site so it appears high in the search engines and uses them to bring even more people to your pages. Our Web development and Promotion methodology, caters to the best of breed processes which helps in a successful on-time and above expected delivery. Phase three ensures that your site attracts even more traffic for which our experts go over techniques like reciprocal links, email signatures, newsletter articles and more

Networking Solutions Techwarezen Software Solutions can network your computers together by peer-to-peer or using a serverbased network and connect you to the Internet. We will help you secure a domain name, locate an Internet service provider, and configure your network for T1-T3, Dialup, DSL, Cable or connection sharing. We can establish remote access setups, which will help an employee, stay in touch with the workplace, irrespective of the geographical location. We offer following networking services:

- Preparation of Network Architecture (Network protocol, Backbone at twisted wire, cable or optical fiber, Net topology, Hub/Switches, Conceptual Diagram etc).
- LAN/ WAN set-up.
- Corporate Intranets
- Network Administration

Quality Assurance & Testing

All the software solutions developed undergo following cycle of testing:

Requirements Analysis:

Testing begins in the requirements phase of the software development life cycle.

Design Analysis:

During the design phase, testers work with developers in determining what aspects of a design are testable and under what parameter those tests work.

Test Planning:

Test Strategy, Test Plan(s), and Test Bed creation

Test Development: Test Procedures, Test Scenarios, and Test Cases & Test Scripts to use in testing software.

Test Execution:

Testers execute the software based on the plans and tests and report any errors found to the development team.

Test Reporting:

Once testing is completed, testers generate metrics and make final reports on their test effort and whether or not the software tested is ready for release. Retesting the Defects In this cycle applications are passed through following levels of testing

Application Maintenance & Support We have years of experience in executing maintenance projects. Our team of experienced consultants has been successfully managing maintenance projects of local clients as well as offshore ones. The quality of product deployment, training and support has everything to do with customer success and satisfaction. We offer annual maintenance plans which are tailor-made as per the client's requirement. If required we depute technical team which works at the client site for the system execution or support as per requirement. Our clientele includes Government organizations as well. We ensure maximum return on investment to the customer as we provide complete offsite telephone support in the form of consultations, assistance and advice on the use and maintenance of the Licensed Software. Our experts' providing technical assistance and advice for problem diagnosis and resolution, have gained us admirer world over. We also offer on-site service calls to Customer's facility. In such cases, our consulting charges are subject to service hour charge, plus reasonable travel and out-of-pocket expenses. **Turnkey Solutions** Techwarezen Software Solutions takes up projects under this service for a fixed price and takes all responsibility of execution and project management. These solutions are ideally suited for projects that are fairly well specified and require well-defined interfacing with the client. We have developed a number of products and MIS applications for its clients in this service. Jupsoft Software Solution's mature software development processes, combined with excellent infrastructure have significantly increased the "on-time and onbudget" delivery of software in the offshore mode. We use a highly effective IMPACT Methodology for offshore and distributed software development.
